EDUCATION

Edith Cowan University

2024 - Dec 2026

Bachelor of Computer Science, Major in Software Engineering

WAM: 74%

Lynwood Senior High School

2017 - 2023

Western Australian Certificate of Education

ATAR: 90.05

VOLUNTEER / WORK EXPERIENCE

Student Consultant – Western Australian University Consultant

Feb 2025 – Dec 2025

- Worked in a team to assist non-profit in communicating their impact for grants by researching possible KPIs to implement.
- Developed a data process map to optimize KPI tracking and presented insights to the **director of non-profit**, improving decision-making for grant application

Marketing Coordinator – Computer and Security Student Association

Feb 2024 – Feb 2025

- Promoted events such as the **Start of Semester Social, Industry Connect, and Linux Workshop** by designing posters and social media graphics using Canva.
- Helped grow a new Instagram account to over **170+ followers within its first semester**.

After School Teacher – Code Camp

Jul 2024 – Dec 2024

- Taught a class of **25 primary school students** how to develop simple games using a block-based coding environment, allowing each student to take a finished game home to showcase to their parents.
- Explained foundational programming concepts such as variable types while managing classroom behaviour.

PROJECTS

ShouldIFish App

- Independently developed a **full-stack web application** that utilises marine API data to predict daily fishing activity using a custom-built algorithm.
- Implemented a **Next.js frontend deployed on Vercel** and a **Python-based backend hosted on Firebase** serverless infrastructure.

Coders for Causes – Winter Volunteer Project

- Collaborated with a **team of 20 university student** to build an event management system for an environmental nonprofit.
- Developed frontend and backend components, including the **navigation bar, create-event page, and JWT authentication endpoint**.

Financial Market Analyzer

- Individually created a web app that uses News and Stock APIs to generate a market summary **via ChatGPT**.
- Purchased a custom domain and deployed the application **DigitalOcean**.
- Built to better understand financial metrics such as the S&P 500 and explore applications of AI.
